Frontend Developer skilled in React.js and modern UI frameworks, with 60+ real-world projects and 3-time Web Design Competition winner, seeking Frontend Intern / Entry-Level React Developer roles.

PROJECTS

User Authentication System

React | Typescript | Tailwind CSS

[Live Link](#) ↗

- Implemented secure login & logout flow with client-side validation
- Used JWT-based authentication with token storage in localStorage
- Built protected routes and conditional rendering
- Simulated real-world auth behavior using mock APIs

Expense Tracker App

React | Context API | Tailwind CSS

[Live Link](#) ↗

- Managed global expense state using Context API with reducer pattern
- Implemented category-based expense tracking with add and delete functionality

E-commerce Web App

React | Redux | Bootstrap 5

[Live Link](#) ↗

- Developed a responsive e-commerce platform using React.js, implementing category-based filtering with tab navigation (All, Men, Women, Electronics)
- Enhanced user experience with skeleton loaders for smooth data loading and better perceived performance
- Implemented stateless JWT authentication, securely storing tokens in localStorage and sending them via Authorization headers

AWARDS

[BCA - Web Design](#) ↗

Winner – 1st Place for three consecutive years and Secured 1st Rank in BCA

EDUCATION

2025 – PRESENT | Ksv University

Master of Computer Application

Pursuing (2nd Semester)
