Frontend Developer specializing in React.js, JavaScript, and Tailwind CSS, with hands-on experience building authentication flows, state-managed applications, and responsive e-commerce UIs. 4× Web Design Competition winner at KSV University. Seeking Entry-Level Frontend Developer / React Developer roles

PROJECTS

User Authentication System

React | Typescript | Tailwind CSS

[Live Link](#)

- Implemented secure login & logout flow with client-side validation
- Used JWT-based authentication with token storage in localStorage
- Built protected routes and conditional rendering
- Simulated real-world auth behavior using mock APIs

Expense Tracker App

React | Context API | Tailwind CSS

[Live Link](#)

- Managed global expense state using Context API with reducer pattern
- Implemented category-based expense tracking with add and delete functionality

E-commerce Web App

React | Redux | Bootstrap 5

[Live Link](#)

- Developed a responsive e-commerce platform using React.js, implementing category-based filtering with tab navigation (All, Men, Women, Electronics)
- Enhanced user experience with skeleton loaders for smooth data loading and better perceived performance
- Implemented stateless JWT authentication, securely storing tokens in localStorage and sending them via Authorization headers
